RESEARCH EXPERIENCE

Research @ Distributed and Storage Systems Lab | UIUC
Research Assistant | Guide: [Ram Alagappan](#), [Aishwarya Ganesan](#)

Aug '23 – present

- Designed and implemented multiple shared log abstractions and systems for modern application paradigms.
- Contributed to projects on CXL data sharing and replicated storage systems.

Networking and Distributed Systems Lab | Hewlett Packard Labs

May'25 – August'25

Research Associate Intern | Guide: [Puneet Sharma](#)

- Designing infrastructure for agentic AI applications.

Improving Cloud Reliability through Systematic Testing | Microsoft Research India

Aug '22 – Jul '23

Research Intern | Guide: [Akash Lal](#)

- Worked on improving reliability of Azure Cloud Services using concurrency testing tools such as [Coyote](#) for C++ programs.
- Built a deterministic concurrency testing framework for a production scale replication library, [Azure RSL](#), which provides an implementation of the Paxos consensus algorithm. Implemented several optimizations to improve state-space coverage.

Parameterized Verification of Distributed Protocols | IIT Madras

Sep '20 – Jul '23

Young Research Fellow | Guide: [Kartik Nagar](#)

- Investigated cutoff-based techniques for verifying that distributed protocols meet their specification irrespective of the size of the parameter they are instantiated with (such as number of nodes).
- Proposed a framework to mechanize simulation based proofs for cutoffs and applied the approach on a variety of distributed protocols using Z3 as a backend SMT solver.
